

HARDFACE L-G

For Welding Professionals

**Resistant to abrasion,
tough on impact**

HARDFACE L-G is a metal cored welding wire for gas shielded arc hardfacing, designed to combat moderate abrasion combined with impact and compressive loads.

The wire produces a medium alloyed welding deposit, ideal for use on components used in industries such as recycling and mining.

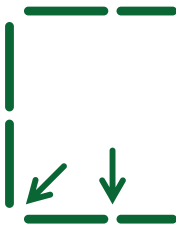

Extend the lifespan of components and reduce the total cost of ownership by protecting them with HARDFACE L-G.

Why choose this solution?

- Semi-automatic, automatic or robotic process
- Metal cored wire, no slag to remove
- Applicable in multiple layers (2-3) without cracks
- Self-tempering deposit
- Deposition rate increased by up to 20% when compared to standard 600HB solid wire

Product Details

Classification:	EN 14700: T Fe8
Available Diameter:	1.2 mm, 1.6 mm, 2.0 mm, 2.4 mm
Hardness:	56 - 60 HRC (as welded, three-layer deposit)
Welding Positions:	

Out of position welding also possible using short circuit or pulsed arc modes of transfer
