## Integra Production Engineer/Manager – WA USA

WA Integra is an integrated part of the Welding Alloys Group, specifically set up to support industries that require wear control and performance optimization. WA Integra is globally renowned for the quality of service provided to our customers: we understand the importance of reliability, consistency and cost-effectiveness for local and international companies alike. The Integra Production Manager will be responsible for leading key people and accountable for the performance of the Integra Business Unit; the main focus being the delivery in full and on time of WA's surface protection products and services in-situ and in-house.

### What we are looking for:

- A strong Manager who has a welding qualification and an Engineering background – BS Engineering desirable
- Someone with an operations background and hands-on approach.
- Someone who is competent in design, fabrication and manufacturing – computer aided design software (Autocad).
- Someone who has experience in working to QA/QC (ISO 9000) standard and knowledge in producing documents, verifying dimensional and conformance to requirements.
- Someone willing and able to travel to visit customers, and run projects in-situ when needed.
- 
- Proficient in MS Office with knowledge of ERP systems.

### The Role:

#### Production

- To manage and coordinate the Integra Shop.
- To deliver (in full and on time) surface protection products and services (in situ and in-house).
- To liaise with customers and produce solutions to various wear/corrosion problems.
- To ensure that all defined quality and production protocols are followed, delivery dates for finished products are met.
- To be responsible for the receipt of all raw materials and ensure they meet the defined quality specifications.
- To ensure sufficient quantities of materials are held in stock to meet production needs.
- To ensure the ERP system is maintained and utilised correctly.
- To ensure there is a system of continuous improvement in the manufacturing processes and production capability.
- To write and implement procedures and work instructions for in-situ and shop work.
- Liaise with local machine shops to quote and manufacture parts.

#### Finance

- To be responsible for the financial management within the Business Unit in order to ensure the gross margin achieves the acceptable standard by:
  - Producing estimates and quotations.
  - Controlling purchases, expenses and margins.
  - Supporting and maintaining the Global ERP Manufacturing system.
  - Submitting the sales & production data to other areas of the business as required.

If you believe you have the capability of meeting the above requirements, please send your C.V. to Jeff Watkins:
