

# Environmental Policy Statement

Welding Alloys is committed to minimising their potential impact on the environment through operating in compliance with all relevant environmental legislation and will where possible strive to use pollution prevention and environmental best practices in all we do.

We will:

- meet or exceed all the environmental legislation that relates to the Welding Alloys Group;
- integrate the consideration of environmental concerns and impacts into all of our decision making and activities;
- promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner;
- educate and inform our employees about environmental issues that may affect their work;
- reduce waste through re-use and recycling and by purchasing recycled, recyclable or refurbished products and materials where these alternatives are available, economical and suitable whenever possible;
- promote efficient use of materials and resources throughout our facility including water, electricity, raw materials and other resources, particularly those that are non-renewable;
- avoid unnecessary use of hazardous materials and products, seek substitutions when feasible, and take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed of;
- purchase and use environmentally responsible products accordingly;
- where required by legislation or where significant health, safety or environmental hazards exist, develop and maintain appropriate emergency and spill response programmes;
- strive to continually improve our environmental performance;
- annually review performance and improvement.
